Medium	Normal	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Manual
Status	Milestone		
Draft	-		

Preconditions

User logged in, already logged out.

Steps to reproduce

#	Step	Action	Expected Result
1	Click Back on the browser.		The page does not return to the login session, it remains logged out.

Test run web petstore

Link BUG REPORT di trello : <https://trello.com/b/rVQoabCB>

This Test Run is created to validate the main end-to-end flow on the PetStore website:

- 1. Login with valid and invalid credentials
 - 2. Add product to the cart
 - 3. Update / remove product from the cart
 - 4. Checkout the product until the confirmation page
 - 5. Logout after completing the transaction
- Test Focus:

- 1. Verify user can log in with valid credentials
- 2. Ensure the system rejects invalid login attempts
- 3. Confirm that products can be added, updated, or removed from the cart
- 4. Validate checkout process until the order confirmation message appears
- 5. Ensure logout successfully ends the user session

Expected Outcome:
All test cases run successfully without major bugs.

Environment:
Website: <https://petstore.octoperf.com/actions/Catalog.action>
Browser: Chrome (latest version)
